WILLIAMSBURG — The law professional-
ing Woman at the College of William and Mary 300 years ago was more out of place in 1780 than now in 1979, but the intervening two centuries have not been without problems, crises and even periods ofoptional.

The first college in America was the College of William and Mary, the second college in the United States.

The history of Thomas Jefferson, the governor of Virginia, was reported by the secretary of the Independent Order of Odd Fellows.

The college was founded in 1721 by Richard Bland, the first rector of the college, and Thomas Jefferson, the second rector. It was chartered in 1720 by King George II.

Jefferson was a student at the college and later became the principal of the college.

Jefferson's early life was marked by poverty and hardship. He was born in Westmoreland County, Virginia, in 1743. He was educated at the College of William and Mary and later studied law at the University of Pennsylvania.

After graduation, Jefferson worked as a lawyer in Virginia and later served as a member of the Virginia House of Delegates.

In 1776, Jefferson was appointed as a member of the Committee of Correspondence, which was responsible for drafting the Declaration of Independence.

Jefferson's ideas and writings, particularly his views on liberty and democracy, have had a profound impact on the development of the United States and the world.
