FISH KILL REPORTING

Virginia Polytechnic Institute and State University reported, in a recent issue of Water News that persons aware of any fish kill in one of Virginia's streams should report the kill to the State Water Control Board's Pollution Response Program (PREP). The phone number is 804 786-2241 and is operational at all times. Persons who report a kill should give the location of the kill and, if possible, the number and kind of fish, whether they are dead or dying, and the condition of the water.

note

In our efforts to publish relevant material for our readers, EPN asks you, our readers, to send us information on those environmental cases and controversies in which you are involved. Many cases are never reported; but we hope that through this method, EPN can disseminate more current information to the readers.
