Scholarly Communications
Scholarly Communications

“The system through which research and other scholarly writings are created, evaluated for quality, disseminated to the scholarly community, and preserved for future use. The system includes both formal means of communication, such as publication in peer-reviewed journals, and informal channels, such as electronic listservs.”

How the Libraries Help with Publishing

As institutions, libraries enter into licensing agreements with many different publishers for collection purposes. As individuals, many librarians write articles and books and have often been in the position of academic author. Use this toolkit to make informed decisions about scholarly publishing as an author, peer reviewer, or editor. Contact the Scholarly Communication and Publishing Librarian to set up a consultation.

Other Toolkits
